

pigLatin 3.0

Devices

Manage your connected devices

Write a function that converts a sentence into a simplified pig latin.

Rules for converting to pig latin:

- For words that begin with a vowel (a, e, i, o, u), add "way" to the end of the word.
- Otherwise, move all letters before the first vowel to the end and add "ay".
- For simplicity, no punctuation will be present in the inputs.

Examples

```
pigLatinSentence("this is pig latin") → "isthay isway igpay atinlay"
```

```
pigLatinSentence("wall street journal") → "allway eetstray ournaljay"
```

```
pigLatinSentence("raise the bridge") → "aiseray ethay idgebray"
```

```
pigLatinSentence("all pigs oink") → "allway igspay oinkway"
```

Notes

What is pig latin actually?
